

Technical rider – Chaix Brothers

→ **Concept**

It's an aerial choreography in music with 2 airplanes remote controlled. They are special effects during the flight, LED on airplanes, long golden ribbons, release of confetti if requested.

→ **Show of 5 min**

→ **Technical constraints**

The show requires stopping fans, blowers to avoid any drafts that might disrupt the path of the aircraft flights. No need for preparation of material on stage (performance begins with planes by hands).

→ **Minimum dimensions of the theater**

-length : 18 m
-width : 12 m
-height : 4 m

→ **Music**

The music will be launched directly from our Ipad (classic jack).
No problem to give you our music on CD or USB key.

→ **Lights**

Possibility to make of a full black instantly (planes will switch on their LED at this time)
An application of our Ipad (Run The Show) will tell you in real time the required fire plan and will give you a count of 10 s before changing lights.

→ **Video**

Opportunity to provide you with a video of clouds spread on a screen during the performance.

→ **Rehearsals**

Allow a minimum of 45 min in order to take our marks with the theater's configuration and refine desired lights for the show.

→ **Plane's information**

Aircraft's design and construction are home made. It is built with polystyrene and carbon.
Engine : electric motor
Wingspan : 90 cm – 3 pi
Weight : 200 grams – 7 oz
Radio control's frequency : 2,4 GHz (don't stray video / audio material)
